# Supply Chain Disruption & Risks Today

- **Surge in Pre-Deadline Imports:** The 90-day tariff pause has triggered a rush of orders, as companies race to get goods into the U.S. before the window closes. Only products that physically enter U.S. customs before the deadline qualify for reduced tariffs.
- **Supply Chain Disruption Risk:** As June and July approach, importers face the growing risk of port congestion, container pile-ups, and limited freight capacity, all of which could delay deliveries and increase costs.
- **US Suppliers Lack of Tariff Transparency:** Many local U.S. suppliers delay disclosing tariff-related fees until the final stages of checkout or invoicing — leaving clients exposed to unexpected costs after making purchasing commitments.
- **Importing Fraud Puts You at Risk:** Even if initiated by your supplier, you — the importer of record — are fully responsible for customs declarations. Errors or fraud can lead to fines, shipment seizures, or criminal penalties.

# Importing Fraud — What It Is and Why It's a Big Risk

- **Common Fraud Schemes by Suppliers:**
  - False Country of Origin – e.g., claiming Vietnam instead of China
  - Understated Invoice Values – declaring \$1,000 for a \$10,000 shipment
  - Zero-Cost "Repairs" – pretending new goods are return-repaired
  - HTS Code Misclassification – mislabeling to reduce duties
- **Your Company Is the Importer of Record:**
  - You are legally responsible for what's declared
  - Not the Chinese exporter — you sign the documents

# Importing Fraud: Consequences

- **Consequences of Fraud:**
  - Civil & Criminal Penalties – fines up to full value of goods; potential jail time
  - Import Privileges Revoked – shipments blocked, importer blacklisted
  - Executive Liability – owners can be held personally liable
    - Officers can be debarred from customs importing, face fines, and even prison time for conspiracy or aiding and abetting fraud.

**Shortcuts today can destroy your business tomorrow. Don't take the risk.**
